KENWOOD

ProTalk®
TK-2400VP/3400UP
Compact VHF/UHF FM 2-Watt Portable Radios

The compact ProTalk® business radios TK-2400VP/3400UP – are Kenwood's latest portable two-way radios. Offering the ideal solution for communications in construction, manufacturing and warehousing, retail, hospitality, facility management and rental fleet applications. Elegantly engineered to provide superb ease of use and audio clarity, even in noisy environments, it also boasts rugged reliability for dependable communications in all weather conditions.

COMPACT DESIGN

Ergonomically contoured for comfort, the ProTalk® naturally fits the hand for a sure grip. Featuring a non-slip elastomer channel knob with improved torque characteristics, it ensures positive response while avoiding accidental changes.

4 & 16 CHANNEL MODELS

ProTalk® 4 and 16 channel models are available to match your needs and requirements, offering ample capacity for multiple channels or radio systems.

- 4 channel (VHF: TK-2400V4P, UHF: TK-3400U4P)
- 16 channel (VHF: TK-2400V16P, UHF: TK-3400U16P)

FREQUENCY & QT/DQT
(Narrowband Compliant)

Users can program a ProTalk® to any of the pre-stored frequencies and QT/DQT codes, thus assuring compatibility with other brands. The ProTalk® VHF (TK-2400VP) 4 and 16 channel models have 27 pre-stored frequencies while the ProTalk® UHF (TK-3400UP) 4 and 16 channel models have 90. Whichever model you pick, there are 39 QT tones and 168 DQT codes*.

For licensing information, please contact the FCC at http://www.fcc.gov

*QT & DQT may also be referred to under other brand acronyms as PL, CG, CTCSS & DPL, DCG, DCS.

SUPER LOCK

An added convenience: managers can "Super Lock" all user controls (except PTT and volume) to prevent accidental channel changes.

WIRELESS CLONING

This feature simplifies the setting up of multiple ProTalk® radios for identical functions, eliminating the need to customize individual radios. (Dealer function only)

CALLING ALERT

This is useful for attracting the attention of staff in noisy environments: pressing the Calling Alert key causes an alert tone to be heard from the other radio's speaker.

INTERNAL VOX/HANDS FREE READY

In many circumstances, workers do not have a free hand to use their radio. VOX (voice-operated transmission) is invaluable for enabling smooth, hands-free communications: the radio itself provides automatic PTT action, while the user simply talks. VOX works with a Kenwood-compatible headset.

TOUGH & WATER RESISTANT

Expertly engineered for rugged work environments, the ProTalk® has been designed to pass industrial drop tests, international IP54/55 water and dust intrusion tests and 11 categories of the U.S. Department of Defense MIL-STD 810 C, D, E, F & G environmental standards tests.

2 WATTS TRANSMIT POWER / RANGE UP to 6 MILES

Kenwood's ProTalk® provides 2 watts of RF power to enable direct radio-to-radio communications on the same frequency (simplex) for distances of up to 6 miles*.

Conditions	TK-2400VP	TK-3400UP
