HURRICANE III HEADSET

With SureFire Patented EarLock[®] Retention Rings and Noise-Reducing Filters

NEW!

Low-profile design can be worn while wearing helmet or mask, or while using a phone

Noise canceling microphone

Sliding switch on Noise-Reducing Filter allows user to control ambient sound level

21dB Noise Reduction Rating with switch closed

Up to 40dB impulse noise reduction with switch closed

Building upon the success of the Hurricane II, the new **Hurricane III** headset with patented **SureFire EarLock[®]** Retention Rings and Noise-Reducing Filters incorporates ground breaking technology from SureFire, a leader in hearing-protection technology. Sounds at safe levels, including speech, are allowed to pass through and can be clearly heard, while potentially harmful noises are reduced via a proprietary design that incorporates a special Noise-Reducing Filter.

A unique switch on the filters enables the user to control the amount of ambient noise that passes into the ear. In the open position, the Noise-Reducing Filters allow ambient sounds and conversations to be heard clearly. In very high noise environments, placing the switch in the closed position increases the noise blocking effectiveness.

All of the benefits of the proven Hurricane design are preserved, including the excellent noise canceling boom microphone and the ability to wear the Hurricane under a helmet or cap.

The OTTO Hurricane III with SureFire's Patented EarLock[®] Retention Rings and Noise-Reducing Filters balances excellent noise reduction with the ability to hear ambient sounds or conversations, all while maintaining clear radio communication. Recommended for shooting ranges, public safety applications, and any environments where loud noises are present and hearing normal conversation is important.
